Work Experience

Senior Flutter Developer

January 2023 – Present

Your Current Company · Full-time · Mumbai, Maharashtra

- Architected and shipped three production Flutter applications serving 50,000+ active users across Android and iOS platforms.
- Designed and maintained RESTful Application Programming Interfaces using Node.js, reducing average response latency by 42 percent through MySQL query optimization and indexing strategies.
- Migrated on-premise backend services to Amazon Web Services Elastic Compute Cloud and Relational Database Service, improving system uptime from 97 percent to 99.9 percent.
- Implemented Business Logic Component state management pattern across all applications, achieving clean separation of user interface and business logic layers.
- Integrated Firebase Authentication, Crashlytics error monitoring, and Firebase Cloud Messaging push notification services across all products.

Flutter Developer

July 2021 – December 2022

Your Previous Company · Full-time · Remote

- Built cross-platform mobile applications from concept to release using Flutter, collaborating with design team to deliver pixel-accurate user interfaces.
- Developed and integrated REST Application Programming Interfaces and authored optimized MySQL stored procedures and database views.
- Established a Continuous Integration and Continuous Deployment pipeline using GitHub Actions, compressing release cycles from two weeks to three days.
- Deployed and managed static assets using Amazon Web Services Simple Storage Service and CloudFront Content Delivery Network.

Notable Projects

Inventory Tracking System

Flutter · Node.js · MySQL · Amazon Web Services

End-to-end warehouse management application with real-time stock tracking, barcode scanning, Portable Document Format reporting, and role-based access control. Backend REST API with 35+ endpoints deployed on Amazon Web Services Relational Database Service and Elastic Compute Cloud.

Real-Time Chat Platform

Flutter · Firebase Firestore · WebSocket

Feature-rich messaging application with encrypted chats, media sharing, read receipts, and push notifications. WebSocket server on Amazon Web Services Elastic Compute Cloud handles 10,000 concurrent connections.

Healthcare Patient Portal

Flutter · REST API · MySQL · Amazon Web Services Lambda

Patient-doctor appointment booking platform with scheduling, prescription management, and Portable Document Format generation. Serverless report processing via Amazon Web Services Lambda reduces backend infrastructure costs by 60 percent.

TECHNICAL SKILLS

MOBILE DEVELOPMENT

- Flutter and Dart — Expert
- State Management — Expert
- Animations and Interface — Advanced

BACKEND AND API

- REST API Design — Expert
- Node.js — Advanced
- GraphQL — Intermediate

DATABASE

- MySQL — Expert
- Firebase Firestore — Advanced
- PostgreSQL — Intermediate

CLOUD AND INFRASTRUCTURE

- Amazon Web Services — Advanced
- Continuous Integration and Deployment — Advanced
- Docker — Intermediate

CERTIFICATIONS

- Amazon Web Services Cloud Practitioner
  Amazon Web Services · 2024
- Amazon Web Services Solutions Architect – Associate
  Amazon Web Services · 2024
- Flutter and Dart – The Complete Guide
  Udemy · 2023
- Google Associate Android Developer
  Google · 2023

LANGUAGES

- English — Native or Bilingual
- Kannada — Professional
- Hindi — Conversational

TOOLS AND PLATFORMS

Git · GitHub · Postman · Android Studio · Visual Studio Code · Figma · Amazon Elastic Compute Cloud · Amazon Simple Storage Service · Amazon Relational Database Service · Amazon Lambda · Firebase · Jira · Notion

Education

Bachelor of Engineering – Computer Science and Engineering 2017 – 2021

Your University Name · Grade Point Average: 8.4 out of 10

Achievements

- **Best Application Award – Internal Hackathon 2023.** Built a real-time fleet tracking application in 24 hours using Flutter and Amazon Web Services Location Services. Won among 18 competing teams.
- **Open Source Contributor.** Merged three pull requests into official Flutter ecosystem packages including flutter_local_notifications and the Dio HTTP client library.
- **Technical Author.** Published 12 in-depth articles on Flutter architecture and Amazon Web Services integration on Medium, accumulating over 4,000 followers.
