Professional Summary

Strategic Flutter Engineer architecting high-availability mobile ecosystems and scalable cloud-native solutions. Expert in bridging the gap between complex UI/UX requirements and high-performance backend systems. A technical leader focused on engineering excellence through CI/CD automation, architectural reasoning, and cross-functional team mentorship.

Work Experience

Senior Flutter Developer

February 2022 – Present

Ostrum tech Limited, UK · Remote

- Architectural Optimization: Refactored and optimized complex legacy codebases, achieving a 60% reduction in source volume while significantly enhancing system scalability and runtime performance.
- CI/CD Architecture: Engineered automated CI/CD pipelines that reduced manual deployment time from 4 hours to 30 minutes per release cycle.
- State & Data Management: Implemented BLoC state management pattern across all applications, achieving clean separation of UI and business logic layers. Implemented HydratedBloc and Drift, reducing redundant network requests by 30% through intelligent local caching and persistence.
- Strategic Resource Management: Decreased monthly cloud infrastructure overhead by 25% through rigorous code optimization and the elimination of redundant API calls.
- Technical Mentorship: Led a team of 5+ developers, conducting bi-weekly technical workshops that reduced average PR revision cycles.

Associate SAP Consultant

September 2019 – February 2022

Infosys Limited, India · Full-time · Mysore & Hyderabad, IN

- SAP HANA Implementation: Spearheaded the implementation of SAP HANA for a major retail client.
- SAP BW Optimization: Led the optimization of SAP BW data models, reducing query execution time and improving overall system performance.
- SAP BI Reporting: Developed and maintained SAP BI reports and dashboards, enhancing data visualisation and decision-making for business stakeholders.
- Migration from On-Prem to AWS Cloud: Played a key role in the migration of SAP systems from on-premises to cloud infrastructure, ensuring minimal downtime and data integrity.

TECHNICAL SKILLS

MOBILE DEVELOPMENT

- Flutter and Dart — Expert
- State Management — Expert
- Animations and Interface — Advanced

BACKEND AND API

- REST API Design — Expert
- Node.js — Advanced
- GraphQL — Intermediate

DATABASE

- MySQL — Expert
- Firebase Firestore — Advanced
- PostgreSQL — Intermediate

CLOUD AND INFRASTRUCTURE

- Amazon Web Services — Advanced
- Continuous Integration and Deployment — Advanced
- Docker — Intermediate

CERTIFICATIONS

LANGUAGES

- English — Professional working proficiency
- Kannada — Native or bilingual proficiency
- Hindi — Limited working proficiency

TOOLS AND PLATFORMS

PROFESSIONAL INTERESTS

Mobile-First Architecture | API Performance | Open Source | Technical Writing | Cloud Cost Optimisation | Developer Experience

Notable Projects

Inventory Tracking System

Flutter · Node.js · MySQL · AWS

End-to-end warehouse management application with real-time stock tracking, barcode scanning, PDF reporting, and role-based access control. REST API backend with 35+ endpoints deployed on AWS RDS and EC2.

Real-Time Chat Platform

Flutter · Firebase Firestore · WebSocket

Feature-rich messaging application with encrypted chats, media sharing, read receipts, and push notifications. WebSocket server on AWS EC2 handles 10,000 concurrent connections.

Healthcare Patient Portal

Flutter · REST API · MySQL · AWS Lambda

Patient-doctor appointment booking platform with scheduling, prescription management, and PDF generation. Serverless report processing via AWS Lambda reduces infrastructure costs by 60 percent.

Education

Bachelor of Engineering – Computer Science and Engineering

2015 – 2019

Nitte Meenakshi Institute of Technology, Bangalore, IN · GPA: 8.6 / 10

Achievements

- **Best Application Award – Internal Hackathon 2023.** Built a real-time fleet tracking application in 24 hours using Flutter and AWS Location Services. Won among 18 competing teams.
- **Open Source Contributor.** Merged three pull requests into official Flutter ecosystem packages including flutter_local_notifications and the Dio HTTP client.
- **Technical Author.** Published 12 in-depth articles on Flutter architecture and AWS integration, accumulating over 4,000 followers.
